FIRST AUSTRALIAN INTERVIEW

CLASH SHOCK

Q: You talk about a lot of political things, what do you think are the important political goals? . . .

A: What do I think is an important political goal? I'll tell ya. Anti-imperialism, right? From Russia and America, right? All they do is gibber out . . . paranoia, right? Americans say, 'Anything is better than Communism' right? Even chopping people's hands off with an axe is better than Communism. Russians right? People wanna get a bit of freedom — bang, dead. Screw all that. I'm gonna kill Mickey Mouse and Ivan the Dwarf.

THE ALBUM

THE SINGLE

"HARDEN MY HEART"

Quarterflash, their debut offering on Geffen Records, is an album as distinctly original as it is accessible—nine songs of American contemporary rock and roll.

Quarterflash derive from the Australian folk saying "A quarter flash and three parts foolish."

But listen to "Harden My Heart" and the album and you'll find this band to be neither flash nor foolish.

Quarterflash simply sounds like a natural fit.

Though many in the anti-war movement are concerned with the effects of the war on the environment, I believe that participation in the war is the most important way to help the environment.

And the 1990s, when the last Soviet troops pulled out of Afghanistan, were the last time the United States sent troops to a conventional war zone. The only American soldiers who spent time in the field during the 1990s were the 100,000 troops sent to Bosnia and Herzegovina in 1995, and then the 20,000 troops sent to Kosovo in 1999. It was something that had not happened since the Vietnam War.

But the 1990s were also the decade in which the United States sent troops to the most dangerous and volatile regions of the world. The 1990s were the decade in which the United States sent troops to the most dangerous and volatile regions of the world. Management's first priority is to ensure that the company's financial position is strong and that the company is able to meet its obligations. This is done by ensuring that the company has sufficient cash and liquid assets to cover its short-term needs. Management also ensures that the company's capital structure is sound and that it has access to financing if needed.

And to think
 Technology finally completed the process—making it possible
 to communicate and interact across time and space. Could we
 really be talking to someone 100 years ago? Well, yes, but not in the
 way you think. It's not like you can dial a number and talk to
 someone. It's more like you can see and hear what they were
 saying.
